

# Press Release

## FOR IMMEDIATE RELEASE

**Dubuque, Iowa — January 2025:** Unison Solutions, a leading provider of biogas conditioning and upgrading systems, is proud to celebrate 25 years of advancing renewable energy solutions. Since its founding in 2000, Unison Solutions has been at the forefront of designing and producing systems that transform raw biogas into clean, renewable energy, helping businesses and communities worldwide to transform waste into valuable renewable energy, supporting sustainability and reducing environmental impact.

### A Legacy of Excellence

Founded with a vision to revolutionize the way biogas is utilized, Unison Solutions has grown into a trusted partner for clients across industries such as wastewater treatment, agriculture, and landfills. Over the past quarter-century, the company has successfully delivered more than 400 systems nationwide, making significant contributions to reducing greenhouse gas emissions and promoting a circular economy.

### Values and Culture

“Our employees, the owners of our company, strive daily to do the right thing, deliver quality in everything we do, and support our customers through the entire life cycle of the project. These values, this culture, have been the foundation of our success.”  
~Dave Broihahn, President

### Looking to the Future

As Unison Solutions marks this significant anniversary, the company remains committed to innovation and environmental stewardship. With increasing global demand for renewable energy, Unison Solutions is poised to expand its product offerings and continue driving progress in the biogas industry.
